

## REMARKS

### Summary

Consideration of the application as amended is respectfully requested.

Claims 15-47 are now in the application. Claims 15-47 have been added, but are based in substantial part upon the originally filed claims 1-14. Claims 1-14 have been cancelled.

A substitute specification is provided to help place the application in proper idiomatic English, to provide required and suggested headings (e.g., Background, Technical Field, Summary, etc.) in proper context, and to apply other general application components for national stage U.S. applications.

The above-noted changes to the specification and claims are provided solely for clarification or cosmetic reasons. For example, in some cases the text has been changed to place the application in proper idiomatic English and/or to clarify the embodiment as it would be understood by one of skill in the art reading the original German application. The changes are neither provided to overcome the prior art, nor do they narrow the scope of the claim for any reason related to the statutory requirements for a patent.

Please note that the application claims priority to German Application No.10 2004 018 338.4, filed April 15, 2004, the international priority of which is claimed under 35 U.S.C. §119, which is the national stage entry of International Application No. PCT/EP2005/004033, filed April 15, 2005, the priority of which is claimed under 35 U.S.C. §120.

No new matter is believed to be introduced by the amendments to either the claims or the specification.

Conclusion

In view of the foregoing, consideration and allowance of claims 15-47 is solicited.
